

Managed Firewall

i-ComplyG3

Stop Threats Before They Stop You

Data loss resulting from cyber-attacks is one of the greatest threats facing your business today. That's why having a network perimeter security solution as the first line of defense is essential to an effective information security program. Network firewall devices and solutions like I-Evolve's **i-ComplyG3** form the foundation necessary to protect your organization's data, network and critical assets from outside intruders and threats. Yet, many organizations continue to be challenged by managing these solutions in-house due to the heavy technical burden of day-to-day management or lack of available, skilled security expertise. I-Evolve's **i-ComplyG3** managed firewall solution is uniquely designed to address all of the complexities associated with the deployment, management and ongoing threat monitoring of these enterprise firewalls.

Firewall Overview

i-ComplyG3 Business Benefits

- No expensive hardware costs or capital investment.
- Industry leading threat protection and intrusion prevention.
- Simplified security management.
- Improved disaster recovery.
- 24x7 monitoring.
- Increased productivity.
- Scalable to meet your organization's needs.

i-ComplyG3: Managed Firewall

Product Features	Cisco ASA	i-ComplyG3	
		Standard	Enterprise
Stateful Firewall - tracks the operating state and characteristics of network traffic.	✓	✓	✓
Multi-WAN Failover and Policy Based Routing – configure multiple Internet connection to share the traffic load, or add a redundant Internet connection to the i-ComplyG3 to achieve a higher reliability network connection	✓	✓	✓
Site to Site VPN – IPSEC and SSL capabilities	✓	✓	✓
Remote Access VPN – IPSEC, SSL, Two factor authentication	✓	✓	✓
Highly scalable security appliance architecture that performs at up to multigigabit speeds; consistent and robust security across small office, branch offices.	✓	✓	✓
Enterprise-class management: Dashboards and drill-down reports of discovered hosts, applications, threats, and indications of compromise for comprehensive visibility.	✓	✓	✓
Scalable – i-ComplyG3 is right sized for your usage and needs. i-ComplyG3 can accommodate growth as needed.		✓	✓
Configuration Backups - backups of configuration changes are safely stored offsite in I-Evolve's secure cloud.		✓	✓
Monitoring – alerting and escalation alerting are included		✓	✓
Replacement Hardware – I-Evolve maintains stock replacement hardware in the event of an onsite hardware failure		✓	✓
Layer-8 Application Control and QoS - Enables user-aware visibility and control over thousands of applications with granular policy and traffic-shaping (QoS) options based on application category, risk, and other characteristics.	✓		✓
Executive Summary Reports – Internet and web content usage statistics based on user or machine			✓
Next-gen Intrusion Prevention System - Provides advanced protection from all types of modern attacks. It goes beyond traditional server and network resources to protect users and apps on the network as well.			✓
Advanced Threat Protection - Instant identification and immediate response to today's most sophisticated attacks. Multi-layered protection identifies threats instantly provides an emergency response.			✓
Advanced VPN technologies - Adds unique and simple VPN technologies including our clientless HTML5 self-service portal that makes remote access incredibly simple.			✓
Powerful user and group web policy - Provides enterprise-level Secure Web Gateway policy controls to easily manage sophisticated user and group web controls.			✓
Advanced Web Threat Protection - i-ComplyG3's advanced engine provides the ultimate protection from today's polymorphic and obfuscated web threats. Innovative techniques like JavaScript emulation, behavioral analysis, and origin reputation help keep your network safe.			✓
