

Cloud Antivirus with optional 24x7 monitoring

i-Protect

What can i-Protect do for your business?

Data loss resulting from cyber-attacks is one of the greatest threats facing businesses today. Having endpoint protection in place that works in conjunction with your firewall is critical to any information security program.

I-Evolve's **i-Protect** takes a new approach to network protection. **i-Protect** blocks malware and infections by identifying and preventing the handful of techniques and behaviors used in almost every exploit.

Isolation

Part of remediating a problem is putting it in quarantine so it can't keep spreading. When necessary, **i-Protect** will isolate compromised devices until we can be sure they're safe.

Threat Removal

If **i-Protect** finds something malicious, it will attempt to automatically remediate the threat.

i-Protect Business Benefits

- No expensive hardware costs or capital investment.
- Industry leading threat protection and intrusion prevention.
- Simplified security management.
- Improved disaster recovery.
- 24x7 monitoring with MTR option.
- Increased productivity.
- Scalable to meet your organization's needs.
